

**DATA SHEET** 

Scalable. Responsive. Innovative.

## Exos X18

Seagate manufactures hard drives that specifically address the demand for hyperscale cloud scalability. As the flagship of the Seagate<sup>®</sup> X class, the Exos<sup>®</sup> X18 enterprise hard drives are the highest-capacity hard drives in the fleet.

## **Best-Fit Applications**

- Scalable hyperscale applications/cloud data centers
- Massive scale-out data centres
- Big data applications
- High-capacity density RAID storage
- Mainstream enterprise external storage arrays
- Distributed file systems, including Hadoop and Ceph
- Enterprise backup and restore D2D, virtual tape
- Centralised surveillance

## Maximum Storage Capacity for Highest Rack Space Efficiency

**Market-leading 18 TB HDD** offering the highest capacity available for more petabytes per  $rack^{\uparrow}$ 

**Highly reliable performance** with enhanced caching, making it the logical choice for cloud data centre and massive scale-out data centre applications

Hyperscale SATA model tuned for large data transfers and low latency

PowerBalance<sup>™</sup> feature optimises Watts/TB

**Maximise total cost of ownership savings** through lower power and weight with helium sealed-drive design

**Proven helium side-sealing weld technology** for added handling robustness and leak protection

**Digital environmental sensors** to monitor internal drive conditions for optimal operation and performance

**Data protection and security** — Seagate Secure <sup>™</sup> features for safe, affordable, fast and easy drive retirement

Proven enterprise-class reliability backed by **5-year limited warranty and 2.5M-hr MTBF rating** 

<sup>1</sup> Compared to 14 TB competitive product

<sup>1</sup> FastFormat models ship in 512e format state. When switching from 512e to 4Kn by executing the FastFormat routine, all data on the drive will be deleted. Note that data must be aligned to 4K sectors to see improved performance in 4Kn format.

<sup>2</sup> Self-Encrypting Drives (SED) and FIPS 140-2 Validated drives available through franchised authorised distributors. May require TCG-compliant host or controller support.

<sup>3</sup> Supports Hotplug operation per Serial ATA Revision 3.3 specification

<sup>4</sup> These base deck dimensions conform to the Small Form Factor Standard (SFF-8301) found at <a href="www.sffcommittee.org">www.sffcommittee.org</a>. For connector-related dimensions, see SFF-8323.

When referring to drive capacity, one gigabyte, or GB, equals one billion bytes; and one terabyte, or TB, equals one tirlion bytes. Your computer's operating system may use a different standard of measurement and report a lower capacity. In addition, some of the listed capacity is used for formatting and other functions, and thus will not be available for data storage. Actual data rates may vary depending on operating environment and other factors, such as chosen interface and disk capacity. The export or re-export of Seagate hardware or software is regulated by the U.S. Department of Commerce, Bureau of Industry and Security (for more information, visit www.bis.doc.gov), and may be controlled for export, import and use in other countries.
